Very important - the seminars (laboratories) are held every 2 weeks. You'll see in the schedule group 1 / group 2.

The weeks are divided in uneven and even weeks. So group 1 needs to go in the uneven week and group 2 needs to go in the even week. The first week of classes (11-15 October) is uneven week so group 1 needs to go to seminar. The second week (18-22 October) of classes is even week so group 2 needs to go to seminars. Week 3 is uneven week so group 1 needs to go to classes and so on. Once you will attend to classes you can talk with the professors to explain you better this system.

You can decide which schedule suits you better, and talk to the professors in order to assign you to a certain group.
